Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-31 are rejected under 35 U.S.C. 102(e) as being anticipated by Doherty et al. (US Pat. 6,567,277).

Regarding claims 1-31, Doherty et al disclose a monitoring device 10 comprising: a housing 11; a channel 26 disposed in the housing 11; a sensing device movable relative to the housing; and a cable 16 having one end secured relative to the housing 11 and another end secured to the sensing device, a portion of the cable 16 being removably disposed in the channel 26 for temporarily storing the cable 16, a display screen

Art Unit: 2835

disposed in the housing 11, the channel 26 being disposed around at least a portion of a perimeter of the display screen wherein the cable has a relaxed outside diameter and a stretched outside diameter, the relaxed outside diameter being greater than a width of the channel and the stretched outside diameter being less than the width of the channel wherein the cable is coiled wherein the cable 16 is received in the channel 26 in press-fit fashion wherein in the cable 16 includes a resilient material forming an outer surface thereon, the resilient material being compressed by a side of the channel 26 to secure the cable 16 within the channel 26. A detent formed on a side of the channel 26, the detent releasably retaining the cable 16 in the channel 26.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Eppley et al (US Pat. 4,941,845) teach data transfer cable.

Chansky et al. (US Pat. 6,603,276) teach dimming control system with distributed command processing.
